## WHY SHOULD I DO ROUTINE MAINTENANCE ON MY SYSTEM?

Our HVAC systems run the majority of the year to keep us comfortable, so it's natural that they would need some attention! They also depend on their humans to change their filter, so if that's not happening, they have to work even harder! Annual maintenance is a cost effective way to ensure the following:

- ✦ The furnace, air conditioner or heat pump is clean and running as efficiently as possible, which saves money on utility bills.
- ✦ The many parts inside the systems are operating within manufacturer specifications.
- ✦ Part and labor warranties remain intact, as annual maintenance is required by the manufacturers.
- ✦ Potential part failures may be seen, which can save the discomfort of being without heating and cooling if a part fails, time from needing to be home for a repair, and money from return trips.
- ✦ Filters can be changed and maintenance completed on other comfort items in your home, such as humidifiers and air cleaners.

It's easy to forget about our HVAC systems, so it's important to be on a plan to stay on track. Our team will help you check this off your list!

\$29.<sup>99</sup>/MONTH  
Paid through ACH

For your convenience, systems that are five years old or less can be scheduled so the furnace and a/c services are completed at the same time!

For systems older than five years, it is recommended that we schedule twice a year; once during the heating season and once during the cooling season.

Please note: If monthly payments are stopped before plan is paid in full, customer is responsible for paying any discounts and services received, within 5 days. \*Each plan expires one year from date of purchase. Our office will send scheduling reminders, however, customer is responsible for scheduling the service. Unused maintenance services will not be refunded.
